# Omani Copper Lantern

High Quality Lanterns Intergrating Traditional Craftmanship

Visual.energy

# Omani Copper Lantern

**High tech, meets tradition,** the most highly technical traditional light in the world.

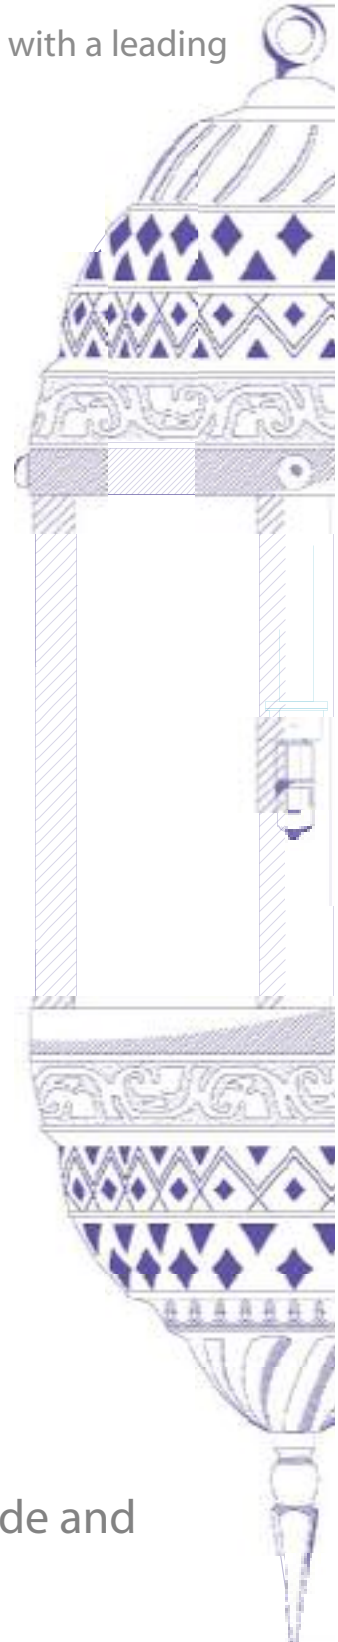

Inspired by the traditions of Oman, and designed by Omani coppersmiths with a leading international lighting design team.

All the copper work is made by qualified Omani coppersmiths, in Oman and each part is uniquely signed and certified as a work of art.

The lamp source is a high tech low voltage lamp in photometrical lighting envelope.

The whole fitting can with stand being inside and out side of any part of the world.

\*Light reflection of pattern onto

The Lantern has been specifically designed to illuminate an specific area with a soft warm light and reflect a pattern onto surrounding walls and ceilings at the same time.

Whilst retaining a hot spot in the middle of the fitting, like a traditional lantern.
